MASTER OF PHILOSOPHY IN MATHEMATICS

SYLLABUS - 2007-09

ST. JOSEPH’S COLLEGE (AUTONOMOUS)
(Nationally Reaccredited with A+ Grade / College with Potential for Excellence)
TIRUCHIRAPPALLI - 620 002
TAMIL NADU, INDIA
1. **ELIGIBILITY**

- A Candidate who has qualified for the Master’s Degree in any Faculty of this University or of any other University recognized by the University as equivalent there to (including old Regulations of any University) subject to such conditions as may be prescribed therefore shall be eligible to register for the Degree of Master of Philosophy (M.Phil.) and undergo the prescribed course of study in a Department concerned.

- A candidate who has qualified for Master’s degree (through regular study / Distance Education mode / Open University System) with not less than 55% of marks in the concerned subject in any faculty of this university or any other university recognized by Bharathidasan University, shall be eligible to register for M.Phil. SC / ST candidates are exempted by 5% from the prescribed minimum marks.

2. **DURATION**

The duration of the M.Phil. course shall be of one year consisting of two semesters for the full-time programme.

3. **COURSE OF STUDY**

The course of study shall consist of

- **Part - I** : 3 Written Papers
- **Part - II** : 1 Written Paper and Dissertation.

The three papers under Part I shall be:

- **Paper I** : Research Methodology
- **Paper II** : Advanced / General Paper in the Subject
- **Paper III** : Advanced Paper in the subject

Paper I to III shall be common to all candidates in a course. Paper I, II, III & IV shall consist of 5 units each covering the subject requirements of the course offered. The Board of Studies shall approve the Syllabi for Papers. The syllabus for paper IV shall be prescribed by each Research Advisor, which is also to be approved by the Board of Studies. The number of specialized papers by the research advisor can be more than one.

Question papers for Papers I to III shall be set externally and valued by two examiners, one internal and one external. The concerned HOD will be in the Board of Examiners to pass the results. Paper IV shall be set and valued by the Research Adviser. The Controller of Examinations shall conduct the examinations for all papers and dissertation.
4. SCHEME OF EXAMINATION

4.1 Part-I (First Semester)

Paper I : Research Methodology
Paper II : Advanced / General paper in the subject
Paper III : Advanced paper in the subject

Part-II (Second Semester)

Paper IV : Field of specialization
Paper V : Dissertation

4.2 Written Examination

The examinations for Papers-I, II and III shall be taken at the end of the first semester and Paper-IV at the end of the second semester. Each paper shall have 100 marks for the semester examination (written) and 100 marks for Continuous Internal Assessment.

The CIA components are:

<table>
<thead>
<tr>
<th>Component</th>
<th>Marks</th>
</tr>
</thead>
<tbody>
<tr>
<td>Seminar-I</td>
<td>15</td>
</tr>
<tr>
<td>Mid semester</td>
<td>35</td>
</tr>
<tr>
<td>Seminar-II</td>
<td>15</td>
</tr>
<tr>
<td>End semester</td>
<td>35</td>
</tr>
<tr>
<td>Total</td>
<td>100</td>
</tr>
</tbody>
</table>

Both the CIA marks and the external marks should be mentioned separately in the mark sheets. The duration for each semester examination shall be 3 hours. A candidate shall be declared to have passed Part-I & II examinations if he/she secures not less than 50 of the marks each in the CIA and the semester examination respectively. The aggregate of the marks secured in the semester examinations and CIA marks taken together must be 50% in each of the Papers I to IV and Dissertation.

4.3 Credits for Papers I to IV

4.4 Dissertation
For carrying out the dissertation the mandatory requirement is strictly adhering to the rules of the college as given below:

4.4.1a Requirement
Every student is expected to give two seminars one concerning Review of Related Literature within the four weeks from the beginning of the second semester and the other on Data Analysis / Result just before the submission of the final draft of the dissertation.

4.4.1b Submission
Candidates shall submit the Dissertations to the Controller of Examination not earlier than five months but within six months in the full time programme. The above said time limit shall start from 1st of the month which follows after the month in which Part-I examinations are conducted. If a candidate is not able to submit his/her Dissertation within the period stated above, he/she shall be given an extension time of three months in the first instance and another three months in the second instance with penalty fees. If a candidate does not submit his Dissertation even after the two extensions, his registration shall be treated as cancelled and he has to re-register for the course subject to the discretion of the Principal. However the candidate need not write once again the theory papers if he / she has already passed these papers.

4.4.1c Requirement
For the valuation of dissertation the mandatory requirement is a pass in papers I to IV. One external examiner and the Research Adviser shall value the Dissertation. The external examiner should be selected only from outside the college and shall be within the colleges affiliated to Bharathidasan University. In case of non-availability, the panel can include examiners from the other university / colleges in Tamil Nadu. The external examiner shall be selected from a panel of 3 experts suggested by the Research Adviser. However, the Controller of Examination may ask for another panel if he deems it necessary. Both the internal and external examiner will evaluate the Dissertation and allot the marks separately. However the viva-voce will be done by both of them. The average marks will be considered.

4.4.2 Viva-voce
The external examiner who valued the Dissertation and the Research Adviser shall conduct the Viva-Voce for the candidate for a maximum of 100 marks. A Candidate shall be declared to have passed in viva-voce if he secures not less than 50% of the marks prescribed for Dissertation and 50% of the marks in the aggregate of the marks secured in viva-voce test and Dissertation valuation. A student can undertake project in the second semester whether or not he /she has passed the first semester.

### External Examination

</tbody>
</table>
5. QUESTION PAPER PATTERN

5.1 Internal (Mid & End)

5.1a For Science

There are two sections A and B:

Section A contains 8 short answer Questions
8 × 4 = 32

Section B contains 4 Essay Question
4 × 17 = 68

Total 100

5.1b For Arts

Only one section of Essay type questions
5 × 20 = 100

5.2 External Exam (Semester)

5.2a For Science

Section A - 10 short answer Questions
10 × 3 = 30

Section B - 5 Essay type Questions either or
5 × 14 = 70

Total 100

5.2b For Arts

Only one section of Essay type questions 5 out of 8 (5 × 20 = 100)

5.2c For the Paper-IV (Optional/Research Adviser's paper)

The Question paper pattern for Paper IV is common for both Science and Arts. The pattern is only one section with Essay type Questions 5 out of 8 (5 × 20 = 100)

There may be two separate mark sheets for the first and second semester respectively. The marks allotted by the guide and that by the External Examiner must be shown in separate columns of the 2nd Semester mark sheet.

6. CLASSIFICATION OF SUCCESSFUL CANDIDATES

6.1 The candidates who pass the Part - I and Part - II examinations in their first attempt shall be classified as follows:

<table>
<thead>
<tr>
<th>No.</th>
<th>Total Marks secured in Part - I and Part - II Examinations</th>
<th>Classification</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.</td>
<td>80% and above in the case of Science Subjects &amp; 75% and above in the case of Arts and Social Science Subjects</td>
<td>I Class with Distinction</td>
</tr>
<tr>
<td>2.</td>
<td>60% to 79% in the case of Science Subjects &amp; 60% to 74% in the case of Arts and Social Science Subjects</td>
<td>I Class</td>
</tr>
<tr>
<td>3.</td>
<td>50% to 59% in all the subjects (Mathematics, Statistics and Computer Science / Applications shall be treated as Science Subjects)</td>
<td>II Class</td>
</tr>
</tbody>
</table>

6.2 Candidates who pass the course in more than one attempt shall be declared to have completed the programme under II Class.
7. QUALIFICATIONS OF RESEARCH ADVISER FOR THE M.Phil. COURSE

7.1 A person eligible to be a Research Adviser shall be required to possess a Ph.D. Degree or two years of Post-Graduate teaching experience after qualifying for M.Phil. / M.Litt. degree. He / She should have obtained recognition from the University.

7.2 In view of the paucity of guides in the newly emerging subjects like Biotechnology, Microbiology, Remote Sensing the research guides in the related areas may be permitted to guide students provided these guides satisfy the qualification requirements.

7.3 Normally a person shall be allowed to guide not more than three candidates.

7.4 Change of guide may be permitted by the Principal based on the merit of the individual cases.

8. ATTENDANCE

✦ Daily attendance for 90 working days should be enforced for the students.
✦ Periodical report of a student to the guide concerned should be recorded in the register kept by the guide.

</table>
Unit I: Research Methodology
An Introduction - Defining the Research Problem- Research Design.] (Text Book 1: Chapter I, II & III pp 1-67)

Unit II: Factorization
Factorizations and Decompositions. (Text Book 2: Chapter 9, Section 9.2)

Unit III: Domination of Graphs
Domination number of Graph-The Independent Domination number of a Graph-Other Domination parameters. (Text Book 2: Chapter 10, Sections 10.1, 10.2, 10.3)

Unit IV: Metric Spaces
Complete Metric Spaces-Compactness in Metric Spaces-Pointwise Compact Convergence. (Text Book 3: Chapter 7 Sections 43, 45 & 46)

Unit V: Homotopy
Homotopy of Paths -The Fundamental Group-Covering Spaces. (Text Book 3: Chapter 9 Sections 51, 52 & 53)

Text Books:
   For Units I, II -Graphs and Digraphs, Fourth Edition - G.Chartrand and

Reference Books:
Paper - II  ALGEBRA & ANALYSIS

Unit I: Modules
Modules homomorphism and exact sequence, projective and injective.
Modules homomorphism and duality.
(Chapter 4.1, 4.3, 4.4, Text Book - 1)

Unit II: Commutative Rings and Modules
Chain conditions-Prime and primary ideals - Primary decomposition. Noetherian rings and modules.
(Chapter 8.1, 8.2, 8.3, 8.4, Text Book - 1)

Unit III: Banach algebras
Banach algebras-spectrum of an element in Banach algebra-spectral radius formula-Quotient algebras-applications.
(Book 2-Chapter 18 pages 386-402, Text Book - 2)

Unit IV: Bounded Operators
(Chapter 12 Sections 12.1 to 12.21, Text Book - 3)

Unit V: Spectrum
The Spectral Theorem-Eigen values of Normal Operators-Positive Operators and Square Roots-The group of Invertible Operators.
(Chapter 12 Sections 12.22 to 12.38, Text Book - 3)

Text Books

Reference Book
Paper III: WAVELETS, FUZZY AUTOMATA AND CHAOTIC SYSTEMS

Unit I: The Discrete Fourier Transform
Properties of Discrete Fourier Transform - Translation - Translation-invariant- The Fast Fourier Transform. (Chapter II, Section 2.1,2.2,2.3).

Unit II: Wavelets on $\mathbb{Z}^n$
Construction of wavelets on $\mathbb{Z}^n$: First Stage - Construction of wavelets on $\mathbb{Z}^n$: The Iteration step - Examples and Applications. (Chapter III, Section 3.1,3.2,3.3)

Unit III: Fuzzy Automata
Fuzzy subsets-finite state machines-finite state automata-languages and grammar- nondeterministic finite state automata-relations between languages and automata - Fuzzy languages-types of fuzzy grammars.
Sections 1.4,1.6-1.10,4.1,4.2.

Unit IV: Fuzzy Grammar
Fuzzy context- free grammars- fuzzy context-free Max-product grammars - Fuzzy finite state machines-Homomorphisms- Submachines of a fuzzy finite state machine-fuzzy recognizers and its languages.
Sections 4.3,4.4, 6.1 - 6.3,6.7, Pages 337,338 of section 7.2.

Unit V: Chaotic Systems
Three simple Chaotic systems Mechanical, Chemical oscillators, The Lorenz equation - Mappings Logistic, Henon maps- Fixed and periodic points of maps - Tents and Horse shoes. (Chapter XV, Section 15.1, 15.2 - 15.2.2 )

Book For Study
Paper-IV: FUNDAMENTALS OF DOMINATION IN GRAPHS

Unit-I: Bounds in terms of degree
Bounds in terms of order and size - Bounds in terms of degree, diameter, and girth.

Unit-II: Bounds in terms of covering
Bounds in terms of independence and covering - Product graphs and Vizing’s conjecture - Grid graphs.

Unit-III: Varieties of domination
Varieties of domination - Multiple dominations - Parity restrictions.

Unit -IV: Location of dominating sets
Locating domination - Distance domination.

Unit-V: Global domination
Strong and weak domination - Global and factor domination.

Text Book

Reference Books
Sem - II
07MMA205

Paper-IV: PRODUCT GRAPHS

**Unit-I: Basic Concepts**
Graphs - Automorphisms and invariants - Hyper cubes and isometric sub graphs.

**Unit-II: The Cartesian Product**
Prime factor decomposition - Automorphisms.

**Unit-III: Strong products**
Strong products and retracts - Direct products in $\Gamma$ and $\Gamma_0$.

**Unit-IV: Algebraic Structures**
Basic algebraic properties of Lexicographic products.

**Unit-V**
Automorphism in Lexicographic products.

**Text Book**
   Sections 1.1 to 1.4, 4.1, 4.2, 5.1, 5.3, 6.1 and 6.3
Sem - II
07MMA206

Paper-IV: LABELING OF GRAPHS

Unit-I: History of Labellings
Statement of the problem - A context for the problem - A history of sub problems.

Unit-II: Characterization
Necessary conditions for graceful graphs - Classes of graceful graphs - some general Questions.

Unit-III: Labelling of complete graphs
Euclidean models and complete graphs - Numbered graphs and difference sets.

Unit-IV: Path Number
Results on path number - The unrestricted path number.

Unit-V: Special type of labelling
Felicitous labellings of graphs.

TEXT BOOK
1. Ronalc Read, Graph theory and Computing, Academic press, 1972
   For units I to IV: Chapter 2 and 3 (page 23 to 44) (Except 2.9 and 3.4)
2. Arumugam, S., Acharya, B.D. and S.Sampathkumar, S., Graph theory and its applications.
   For Unit V: Chapter 3 Pages 47 to 61.
Sem - II
07MMA207

Paper-IV: HOMOLOGICAL ALGEBRA AND SEMIGROUPS

Unit-I: Modules
Modules, Free modules, Exact sequences, Semi exact sequences, Tensor Products.

Unit-II: Modules of Homomorphisms
Modules of Homomorphisms projective Modules Injective modules - Categories and Functors
- Notion of Category and functors and examples
(Treatment as in "Introduction to Homological Algebra by S. T.Hu.)
Chapter I and Chapter II Pages 24 - 100

Unit-III: Semigroup
Semigroup, Basic definitions, Semigroup of relations on a set of Congruences. Factor
groupoids and homomorphisms - Units and Maximal subgroups.

Unit-IV: Bands and semilattices
Bands and semilattices, regular semi groups, Inverse semi groups. Embedding semigroups
in groups Free semi groups and generating relations.

Unit-V: Green's relations
Green's relations - D-structre of the full transformation semi group Tx on a set x. Regular D-
classes. Simple semigroups. Principal factors of a semigroup (Treatment as in “The
Algebraic theory of Semigroups” Vol I by A.H.Clifford and G.B. Preston Chapter I and II
pages 1 -75)

Reference:
1960.
Sem - II
07MMA208

Paper-IV: STOCHASTIC MODELS IN QUEUEING THEORY

Unit-I: M/M Models

Steady state solution for M/M/1 model - Measures of effectiveness - Waiting Time distributions - Little’s formula - Finite system capacity - Queues with truncation (M/M/1/K) - Transient behaviour - Busy period analysis. (Sec 3.1 to 3.4).

Unit-II: Birth-Death Processes

Birth-Death Processes - Queues with parallel channels (M/M/C) - Queues with parallel channels and Truncation (M/M/C/K) - Erlang’s formula (M/M/C/C). (Sec 3.1 to 3.4).

Unit-III: Queues with unlimited service

Queues with Unlimited Service (M/M/∞) - Steady state results - Transient analysis - Finite source Queues - State dependent Service - Queues with impatience - M/M/1 Balking - M/M1 Reneging. (Sec 3.5 to 3.8).

Unit-IV: Bulk Input

Bulk Input (M/M/1) - Bulk Service (M/M/1) Erlangian Models (M/E/1 and E/1) (Sec 4.1 to 4.3.2).

Unit-V: General Service

Single Server Queues with Poisson Input and General Service (M/G/1) - Measures of effectiveness - Steady system size Probabilities - Special Cases (M/E/1 and M/D/1) (Sec 5.1.1 to 5.1.5).

Text Book

Sem - II
07MMA209

Paper-IV: HARMONIC ANALYSIS

Unit-1: Fourier Series & Integrals
Definition and easy results - The Fourier transform - Convolution, approximate identities, Fejer’s theorem - Unicity theorem, Parseval relation; Fourier Stieltjes Coe - The Classical Rernals. (Chaper 1)

Unit-2: Fourier series and Integrals (continued)
Summability: Metric Theorems - Pointwise summability - Positive definite sequences: Herglotz theorem - The inequality of Hausdorff and Young - Measures with bounded powers; endomorphisms (Chapter1)

Unit-3: The Fourier Integral
Introduction - Kernels of R - The Plancherel theorem - Another convergence theorem; the Poisson summation formula - Bochner’s theorem - The continuity theorem. (Chaper 2)

Unit-4: Discrete and Compact groups
Characters of discrete groups - Characters of compact group - Bochner’s theorem (Chapter 3; Sec 3.1, 3.2, 3.3)

Unit-5
Examples - Minkowski’s theorem - Measure on infinite product spaces - continuity of seminorms. (Chapter 3; Sec 3.4, 3.5, 3.6, 3.7)

Text Book
Sem - II  
07MMA210  

**Paper-IV: ADVANCED FLUID DYNAMICS**

**Unit 1: Motion of a Sphere**
Motion of a Sphere through an infinite mass $A$ of a liquid at rest at infinity - Liquid streaming past a fixed sphere - Equations of motion of a Sphere - Sphere projected in a liquid under gravity - Pressure distribution on a Sphere  
[Chapter 8, Articles 8.1 to 8.7 pp 350 to 371]

**Unit 2: Concentric Spheres**
Concentric Spheres - Problem of Initial motion - Three dimensional sources, sinks and doublets - Complex Potential due to a 3D doublet - Image of a 3D source w.r.to a plane - Image of a 3D doublet w.r.to a plane - Image of a 3D source w.r.to a Sphere - image of a doublet in front of a Sphere  
[Chapter 8, Articles 8.9 to 8.17, pp 371 to 396]

**Unit 3: Wave Motion**
General expression of a wave motion - Mathematical representation of wave motion - Standing or Stationary waves - Types of liquid waves - Surface waves - Energy of Progress waves - Energy of Stationary waves - Progressive waves reduced to a case of Steady motion - Waves at the interface of two liquids.  
[Chapter 10, Articles 10.1 to 10.10, pp 508 to 524]

**Unit 4: Newtonian**
Newton's law of viscosity - Newtonian and Non-Newtonian fluids - Body and Surface forces - Stress vector - State of stress at a point - Plane Stress, Principal stresses and Principal directions.  
[Chapter 11, Articles 11.1 to 11.10, pp 553 to 572]

**Unit 5: Nature of strain**
Nature of strain - Transformation of the rates of strain components Relation between stress and rates of strain - Stoke's law of viscosity.  
[Chapter 11, Articles 11.12 to 11.14, p.582 to 594]

**Paper-IV: NON-LINEAR DIFFERENTIAL EQUATIONS**

**Unit I: Integral Manifolds**
Groanwall's inequality - phase space - critical points - periodic solutions - First integrals and integral manifolds - Liouville's theorem.

**Unit II: Linear System**
Two, three dimensional linear systems - critical points of nonlinear equations - The Poincare-Bendixson theorem and its applications - periodic solutions in \( \mathbb{R}^n \).

**Unit III: Stability Theory**

**Unit IV: Centre Manifolds**
Bifurcation - averaging and normalisation - centre manifolds - bifurcation of equilibrium solutions - Hopf bifurcation.

**Unit V: Chaos**
Chaos - The Lorenz equations - one dimensional chaos: the quadratic map, the tent map - Fractal sets and its dynamical characterisations Lyapunov exponents.

**Text book**
   Chapters: 1 - 5, 7, 13 and 14.
Paper-IV: ADVANCED FUZZY AUTOMATA

Unit-I: FINITE AUTOMATA
Finite State System - Basic Definitions - Non-Deterministic Finite Automata- Finite Automata with $\varepsilon$-moves - Regular Expressions. Chapter- 2 (Section: 2.1 to 2.5)

Unit-II: PROPERTIES OF REGULAR SETS
The Pumping Lemma for regular sets- Closure Properties of regular sets.
Chapter-3 (Section: 3.1, 3.2) Chapter- 4 (Section: 4.1, 4.2)

Unit-III: CONTEXT FREE GRAMMARS
Chapter- 4 (Section: 4.3, 4.4) Chapter- 6 (Section: 6.1, 6.2)

Unit-IV: FUZZY SET THEORY
Definitions - Basic Operations on Fuzzy Sets - The Extension Principle Membership functions and Fuzzification. Chapter- 2 (Section: 2.2 to 2.5)

Unit-V: FUZZY GRAMMAR AND FUZZY AUTOMATA
Fuzzy Languages - Fuzzy Grammars - Fractionally Fuzzy Grammars - Fuzzy Automata.
Chapter- 8 (Section: 8.2 to 8.4, 8.10)

Books for Study

Paper-IV: CRYPTOGRAPHY

Unit I: Symmetric key encryption
Symmetric key encryption - Stream ciphers - Block Ciphers - DES - Modes of operation.

Unit II: Public-key cryptography
Modular arithmetic - Discrete key log function - RSA system.

Unit III: Operations in RSA
Digital signature - Hash functions - Merkle’s method - Probabilistic signatures

Unit IV: Discrete logarithm
Elgamal’s encryption - Digital signature algorithm - Robin’s encryption

Unit V: Protocols
Kerberos - Diffie-Hellman key agreement - Fiat-Shamir identification scheme - Zero knowledge

Text Books
   Chapter 2 : 2.1, 2.2
   Chapter 3 : full
   Chapter 4 : 4.1, 4.2.1 to 4.2.3

Reference
Unit I: Metric Contraction Principles
(Chapter 3: Sec : 3.1-3.6)

Unit II: Hyper convex spaces
Hyper convexity - Properties of Hyper convex spaces - a fixed point theorem -intersection of hyper convex spaces - approximate fixed points - Isbell's hyper convex hull.
(Chapter 4: Sec : 4.2-4.7)

Unit III: Normal structures in Metric spaces
A fixed point theorem - structure of the fixed point set - uniform normal structure - uniform relative normal structure - Quasi normal structure - Stability and normal structure - ultra metric spaces - fixed point set structure - separable case.
(Chapter 5: Sec : 5.1-5.8)

Unit IV: Metric Fixed Point Theory
Contraction mapping - Basic theorems for nonexpansive mapping - A closer look at l1 - The Goebel-Karlovitz Lemma - Orthogonal Convexity
(Chapter 8: Sec : 8.1-8.6)

Unit V: Fixed Point Theory in Banach Lattices:
Structure of the fixed point set - Asymptotically regular mapping - set valued mappings - Fixed point theory in Banach lattices.
(Chapter 8: Sec : 8.7-8.10)
